30 November 1961

MEMORANDUM FOR THE RECORD

SUBJECT : Conversation with Dr. Hugh L. Dryden, Deputy Administrator,
National Aeronautics and Space Administration, on 29 November
1961

1. I was finally successful in getting through to Dr. Dryden after several days of trying. He is recuperating from an operation and is only in the office part time.

2. I asked Dr. Dryden if it might not now be timely to request from NASA whatever preliminary information might be on hand regarding the sonic boom tests which have been conducted with the B-58 aircraft at Edwards Air Force Base under joint NASA/USAF sponsorship of late. He said that my request was fairly coincidental, since he had just this date reminded himself of our interest in this problem and had called for the submission of the preliminary data to him for transmission to us from NASA at Langley. He said he would telephone me within the next few days when he expected to have the data on hand.
